

ALL PSU now also stock and sell Phoenix Contact power supplies

Phoenix Contact power supplies are at the cutting edge of the DIN rail power supply market with leading efficiencies, compact size and many extra features such as free downloadable software for monitoring their very compact DIN rail UPS systems.

Phoenix have listened to the industry and have produced one of the most comprehensive ranges of power supplies to suit Railways, ATEX areas, Panel builders, Automation machinery and more. Just some of these features are:

• Wide range universal input	• Industry standard screw terminals
• Single phase power supplies	• Efficiencies up to and over 94%
• Three phase power supplies	• Very high MTBF
• DC/DC converters	• Operating temperature range -40C to +70C
• ATEX approved units	• AC/AC UPS system
• DC/DC UPS systems	• Continuous bonus power up to 50%
• Cutting edge SFB Technology	• Redundancy modules with ACB Technology to increase service life.

With new models and ranges being developed all the time Phoenix aim to meet the most demanding customers' requirements and are happy to assist on technical issues.

With large stocks held in the UK, and backed up by very large stocks in Germany, quick delivery of any quantity is possible.
